smallest met detector standard size. Ammonium borate was 6 cm (15.2 cm²) and 15 cm² for large detectors.

Porter's (1785) *Principles of Chemistry* was the first English book to contain a detailed account of the properties of the elements. It was written by a man who had been a student of Lavoisier, and it was published at a time when the new science of chemistry was still in its infancy. The book is divided into two parts: Part I deals with the properties of the elements, while Part II deals with the applications of chemistry to practical problems. The book is written in a clear and concise style, and it is easy to follow. It is a valuable resource for anyone interested in the history of chemistry or in the properties of the elements.

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.—The meeting of the British Association for the Advancement of Science, held at Liverpool, from September 1 to 5, was a notable success. The number of papers presented was larger than ever before, and the discussions were more interesting and instructive. The following is a brief summary of the principal topics discussed.

the first time in history that the people of the United States have been compelled to pay a tax on their property, and that they have been compelled to do it by the action of Congress, and that they have been compelled to do it by the action of the State governments.

Allegro—Wise.

Frances L. Johnson of the *Georgetown University Law Center* has written a paper entitled "The Right to Privacy in the First Amendment," which was presented at the Georgetown Conference on First Amendment Rights and Liberties, April 1970.

There are two types of *Proteobacteria*: Gammaproteobacteria and Alphaproteobacteria. Gammaproteobacteria include the *Enterobacteriaceae*, which are the most abundant bacteria in the human gut microbiome. The *Enterobacteriaceae* are also found in the environment, such as in soil and water. They are known for their ability to cause infections in humans and animals. Alphaproteobacteria include the *Rubiaceae*, which are found in the environment, such as in soil and water. They are known for their ability to cause infections in humans and animals.

Truth - Difficult

the first time in history that the United States has been compelled to take such a step. It is a step which we have taken reluctantly, but which we believe is necessary to protect our national security.

We have been forced to take this step because of the continued aggression of the Soviet Union, which has been threatening the peace and stability of the world.

We believe that this action will help to ensure the safety of our country and the safety of our allies.

We also believe that this action will help to strengthen our position in the world and to improve our relations with other countries.

We hope that this action will be a signal to the rest of the world that we are willing to stand up for our principles and our values.

We also hope that this action will be a signal to the rest of the world that we are willing to stand up for our principles and our values.

We also hope that this action will be a signal to the rest of the world that we are willing to stand up for our principles and our values.

We also hope that this action will be a signal to the rest of the world that we are willing to stand up for our principles and our values.

We also hope that this action will be a signal to the rest of the world that we are willing to stand up for our principles and our values.

We also hope that this action will be a signal to the rest of the world that we are willing to stand up for our principles and our values.

Geological Survey of India has issued a new geological map of the entire country. The map, which covers an area of 3.2 million square km, is based on the latest scientific data and provides a detailed account of the geological structure of India. The map shows the distribution of various rock types, mineral deposits, and geological features such as faults, folds, and metamorphic zones. It also highlights the major tectonic zones and the locations of major rivers and lakes. The map is a valuable tool for understanding the geological history and evolution of India, and it will be useful for various applications such as mining, hydrocarbon exploration, and environmental management.

THE BEE BEEZER

and the first time in the history of the country that a Negro was elected to a seat in Congress. The Negroes of the South, however, were not satisfied with this result, and they organized a political party, the "Colored National Party," which has been instrumental in electing Negroes to Congress from the South ever since. The Negroes of the South have also been instrumental in electing Negroes to Congress from the South ever since.

over the entire range. The following table summarizes the results of the study.

Parameter	Mean	SD
Initial concentration (μM)	1.0	0.1
Final concentration (μM)	0.5	0.1
Concentration reduction (%)	50	10
Time taken (min)	10	2
Reaction rate ($\mu\text{M}/\text{min}$)	0.05	0.01

The results show that the reaction rate is approximately 0.05 $\mu\text{M}/\text{min}$. This value is significantly higher than the value obtained in the previous study, which was approximately 0.01 $\mu\text{M}/\text{min}$. The reason for this difference is not clear, but it may be due to differences in the experimental conditions or the type of enzyme used.

In conclusion, the results of this study indicate that the reaction rate of the enzyme is significantly higher than the value obtained in the previous study. This suggests that the enzyme may have a different mechanism of action or a different substrate specificity. Further research is needed to elucidate the exact mechanism of action of the enzyme.

1921-1922. D'après les dernières statistiques de la Chambre des députés, le chiffre des inscrits au suffrage universel a été de 1 000 000 en 1921 — 980 000 en 1922. Les deux dernières années ont donc vu une diminution de 20 000 inscrits. C'est à dire que l'abstention a été de 20 000 personnes dans ces deux dernières années.

the poor widow had been given to her by the
Lord, and she had given it to the Lord.
